

Name : Meenaxiben Dalpatbhai Solanki

Age: 50 years

Address: J-501, Smruddhi Residency, Narol

Story: Before joining SEWA, I used to do embroidery work. Besides that, I used to work for the Union department and get members pay for subscription. I am associated with SEWA for the last 30 years and with VimoSewa for last 21 years. I work as an insurance advisor wherein I give information regarding various insurance packages to members and try to enrol them for the same. My family consists of myself, my husband, two daughters and a son. My husband works part time with the corporation.

In September (which year?), I had got wet in the rain. Thereafter I caught cold and developed high fever due to it. I had some warm water and felt a little relief. In the afternoon my health started to deteriorate. I went to VS hospital, but they didnt admit me and instead asked me to get tested for corona. Later I was taken to SVP hospital and got tested for corona which came as negative. But still my health kept on deteriorating. A 108 ambulance was called and I was taken to the GCS hospital and later admitted there. I didnt have fever but had severe headache and difficulty in breathing. Again I was tested for corona and my report came out as positive. I remained in GCS hospital for 11 days and later came home after recuperating. I was again home quaranined for 15 days.Had I not taken insurance against corona, how would I have compensated the money I had taken as loan for my treatment? I had insurance and so could get Rs 25000 out of it. I am very grateful to VimoSewa for this timely help.
